

Is Primary Care ready
and able to adapt to a shift
in the way that care is given
in the community

Have the learning
Transport Education
Parks / Greenways
Confidence & ready to go

Strategic "More More" Group
Voluntary sector network
Understanding what's happening

How Can We Strengthen Cross-Sector Relationships. Working better together to achieve common goals.

Sustainable Exit Routing.
An element that impact a person's life

Collaborative
Not Transactional.

what is offered
⇒ Co-design a programme with participants

Community Relationships are good.

Some people are in community connect

doesn't lead to 'Health relationship'

Where do you find correct

full voice & no voluntary sector
are we hearing all options

How do we ^{better} work together with the 'health system' to support with implementation + sustainability of things we want to do to help bridge the gap between health + PA?

LONG-TERM/SUSTAINABLE

APPROACHES

HOW CAN WE TAKE

LONG-TERM/SUSTAINABLE
APPROACHES
TO COMMUNITY
"PROVISION"?

Is long term
a generation?

Change & sustain
how to start
with early years!

- Inc. "free @ PoA"

How do we practically work with health partners in 'place' when there is so much risk aversion? (Vol Sector)

The systems - are they connected?
Do they work collaboratively?

Do people understand what physical + health
literacy are? Common issues with understanding.

Are we in the health system
that don't always support physical literacy but it is a 2 way street or should be

Not to be healthy element be broken down
of healthy eating, mental health etc.

Also the health professionals put on
importance of being active.

Is it as simple as a lack of understanding in
health literacy impacts the ability for a person to
be active of up to 70% of the population

How do we integrate

Physical literacy + health literacy?

What about health
literacy do you mean?

How do we bridge the gap
between health services and
physical activity providers?
(From referral into activities)
